USER INTERFACE AND DESIGN LAB

Laboratory Observation NoteBook

Name : THARUN KUMAR S
Year/Branch/Section : II/CSE/D
Register No. : 230701393
Semester : IV
Academic Year: 2024-25

Ex. No. : 5a

Date : 29.03.2025

Register No. : 230701393

Name : THARUN KUMAR S

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface using

Axure RP

AIM:

The aim is to demonstrate the lifecycle stages of UI design via the RAD model and develop a small interactive interface employing Axure RP.

PROCEDURE:

Tool Link: <https://www.axure.com/>

Simulating the Lifecycle Stages for UI Design Using the RAD Model

RAD Model (Rapid Application Development): The RAD model emphasizes quick development and iteration. It consists of the following phases:

1. Requirements Planning:

- Gather initial requirements and identify key features of the UI.
- Engage stakeholders to understand their needs and expectations.

2. User Design:

- Create initial prototypes and wireframes.
- Conduct user feedback sessions to refine the designs.
- Use tools like Axure RP to develop interactive prototypes.

3. Construction:

- Develop the actual UI based on the refined designs.
- Perform iterative testing and feedback cycles.

4. Cutover:

- Deploy the final UI.
- Conduct user training and support.

Axure RP Interactive Interface Development

Phase 1: Requirements Planning

1. Identify Key Features:

- Navigation (Home, Product Categories, Product Details, Cart, Checkout,

Order Confirmation, Order History)

- User actions (Browsing, Searching, Adding to Cart, Checkout, Tracking Orders)

2. Create a Requirements Document:

- List all features and functionalities.

- Document user stories and use cases.

Phase 2: User Design

1. Install and Launch Axure RP:

- Download and install Axure RP from Axure's official website.

- Launch the application.

2. Create a New Project:

- Go to File -> New to create a new project.
- Name the project (e.g., "Shopping App Interface").

3. Create Wireframes:

- Use the widget library to drag and drop elements onto the canvas.
- Design wireframes for each screen:
 - Home Page
 - Product Categories
 - Product Listings
 - Product Details
 - Cart
 - Checkout
 - Order Confirmation
 - Order History

4. Add Interactions:

- Select an element (e.g., button) and go to the Properties panel.
- Click on Interactions and choose an interaction (e.g., OnClick).
- Define the action (e.g., navigate to another screen).

5. Create Masters:

- Create reusable components (e.g., headers, footers) using Masters.
- Drag and drop masters onto the wireframes.

6. Add Annotations:

- Add notes to describe each element's purpose and functionality.
- Use the Notes panel to add detailed annotations.

Phase 3: Construction

1. Develop Interactive Prototypes:

- Convert wireframes into interactive prototypes by adding interactions and transitions.
- Use dynamic panels to create interactive elements (e.g., carousels, pop - ups).

2. Test and Iterate:

- Preview the prototype using the Preview button.
- Gather feedback from users and stakeholders.
- Make necessary adjustments based on feedback.

Phase 4: Cutover

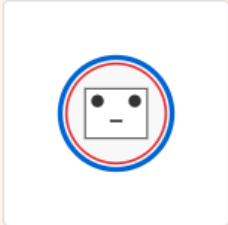

1. Finalize and Export:

- Finalize the design and interactions.
- Export the prototype as an HTML file or share it via Axure Cloud.

2. User Training and Support:

- Conduct training sessions to familiarize users with the new interface.
- Provide documentation and support for any issues.

OUTPUT:

<div>eBay :)</div> <div>Search Products...?</div> <div></div> <div>Spring Sale Event</div> <div></div> <div>Sign In</div>	<div>Save extra on 10 Million+ Products</div> <div>Daily Deals Fashion Electronics Home</div> <div>Sports Books Collectibles</div>
<div>Top Rated</div> <div></div> <div>Fossil Men's Grant Sport Chronograph Watch FS5237</div> <div>★★★★☆ 42</div> <div>\$12,499</div> <div>Buy Now Add To Cart</div>	<div>Checkout</div> <div>Name : <input type="text"/></div> <div>Phone no. <input type="text"/></div> <div>Email ID <input type="text"/></div> <div>Address : <input type="text"/></div> <div>Mode Of Payment <input type="text"/></div> <div>Order Summary </div>

RESULT:

Hence, demonstration of the lifecycle stages of UI design via the RAD model and develop a small interactive interface employing Axure RP.
